

Introduction

Computer Engineering student minoring in Immersive Realities. A creative, hardworking, critical thinker and innovator.

Education

B.Tech., Computer Engineering	CGPA : 9.39 2027
Usha Mittal Institute of Technology, Mumbai	
Senior Secondary (HSC)	74.33% 2023
R P Jr College Of Arts, Science & Commerce	
Secondary (CBSE)	92.40% 2021
Rahul International School	

Experience

Content Strategist at GDG UNIT	<i>2025-26</i>
Currently leading GDG UNIT's content, social media and design initiatives.	
Data Science Intern at Prodigy InfoTech [Certificate]	<i>July - August 2025</i>
Interned at Prodigy InfoTech, completing 5 hands-on tasks in data analysis, visualization, and ML fundamentals.	
Social Media & Graphics Head at SNDT ACM-W	<i>2024-25</i>
Led ACM-W SNDT's social media and design initiatives, elevating engagement by 40%, represented the council at 5+ major events like GOLD and SemiCode, and introduced 100+ students to tech concepts during Hour of Code 2024.	

Projects

Leaf Disease Detection	<i>October 2025</i>	
- Developed a MobileNetV2-based leaf disease detector achieving 97% accuracy across 14+ plant disease classes. - Deployed a Streamlit web app for real-time leaf disease prediction with confidence visualization. - Improved model generalization using transfer learning and data augmentation for scalable AI-driven agriculture. Tools Used: Python, TensorFlow, Keras, Streamlit, Google Colab		
US Accidents Data Analysis	<i>July 2025</i>	
- Analyzed 2.8GB US Accidents data to find patterns by time, weather, visibility, and road features. - Created 11+ visualizations showing peak hours, city trends, and high-risk road zones. Tools Used: Python, pandas, seaborn, matplotlib		
Java Ping Pong Game	<i>April 2025</i>	
- Engineered a fast-paced 2D arcade Ping Pong game to apply real-time game mechanics and OOP principles. - Integrated collision detection, dynamic sound effects, a responsive UI scoring system, and intuitive keyboard controls. - Integrated 3 difficulty levels, showcasing programming logic and interactive design in a polished desktop game. Tools Used: Java, Eclipse		

Skills

Languages: C, C++, Java, Python, SQL

Libraries/Frameworks: NumPy, Pandas, Matplotlib, TensorFlow, Keras, Plotly, Streamlit

Tools: Google Colab, Jupyter Notebook, Github, Eclipse

Achievements

- Completed Data Analytics Job Simulation with hands-on tasks in EDA, forensic tech, and real-world data analysis. [\[Certificate\]](#).
- Best Project Title at ACM Summer School 2025 for innovative storytelling and XR-driven user engagement. [\[Certificate\]](#).
- Participant in SpaceSprint Hackathon 2024 (40+ teams), developed tech-driven solutions for space & sustainability. [\[Certificate\]](#).
- Solved 4 algorithmic challenges at SemiCode 2024, emphasizing collaboration and real-world problem-solving. [\[Certificate\]](#).
